

Subject: Implementation of Regulation (EU) 2019/1148 on the trade and use of explosives precursors from 1 February 2021

Dear Client,

In order to prevent the illicit manufacture of explosives, the European Commission requires stricter restrictions and controls on the sale and use of explosives precursors to be implemented from 1 February 2021.

Products sold by Lerochemas JSC, such as hydrogen peroxide 50% or/and 60%, are considered as restricted explosives precursors.

From now on, JSC Lerochemas employees will be obliged to verify each year, after the first sale, that their buyer/customer is authorised to purchase the explosives precursor and that it will be used for legitimate purposes.

You will therefore find attached a declaration entitled "Customer Declaration", which commits you to using our products for good purposes. We suggest that you fill in this declaration now and send it to us duly signed to: info@lerochem.eu

The personal data collected will be stored in our services for 18 months after the last purchase of products under the contract. Please find enclosed information on the processing of personal data by Lerochemas UAB. Below you will find our data protection procedures and, if necessary, the means of assistance.

Thank you for your cooperation and involvement against the unauthorised use of our products.

Sincerely,
Lerochemas JSC team
